Agenda

- Priorities, facts and concerns
- Impact on schedule
- Action plan

Priority 1

Ensure that everyone can **achieve the learning objectives** and successfully complete RES.

Priority 2

Network programming is fun. Let's try to keep it thy way.

Facts

We will need to work **as hard** as the previous years.

We will need to work **more regularly** than the previous year.

Concern 1

What is the biggest risk, that might prevent someone to achieve the learning objectives?

Concern 2

How can we help?

Personal feeling

Some of us might have a hard time to find a rhythm and to work regularly, quickly falling behind.

Keeping in touch is vital. Work in study groups.

Schedule your work. Stick to your schedule.

Impact on schedule

We can adapt the semester schedule to remote teaching. We will reorder the chapters, to take advantage of existing material (webcasts) while we produce new content.

We maintain the dates for the evaluations

We do not know yet how we will organize the logistics and will be creative. Some evaluations might happen in one-to-one video calls.

We also work during the week of Ascension

We have a lot to do until the end of the semester and have to make up for this week.
